A 30-year-old man presents with a 2-day history of runny nose and sore throat. He feels hot and sweaty, has a mild headache, is coughing up clear sputum, and complains of muscle aches.

Common cold

No need for Antibiotic

A 10 year old boy was brought into the emergency department by his mother because she was worried about ongoing diarrhoea for three weeks and vomiting following every meal. As a result he had lost a lot of weight and was extremely thin. The mother was also worried about an on going cough. She had been infected with TB one year before. She had completed her treatment and was now sputum negative, but the child had not received any TB prophylaxis at the time and she was worried he may also have TB.

- TB enteritis
- Resistant Intracellular organism
- Combination antibiotic for long time

An 18-year-old woman presented with a progressively worsening headache, photophobia, fever, and vomiting. At presentation, she had clinical signs of meningism.

Meningitis

Combination antibiotic

Cross blood brain barrier

A 32-year-old pregnant woman presented to the hospital at 23 weeks of gestation with fever and productive cough of yellowish sputum. Her chest X-ray showed consolidation at the lower lobe of the right lung.

Safe antibiotic during pregnancy (+/- lactation)

A 68-year old woman, comes to the clinic requesting an evaluation for ongoing diarrhea. Her diarrhea has persisted for about 4-days and occurs 3-6 times per day. She reports some occasional nausea, but no vomiting. When asked if she has ever had this problem before, she says that she has – it first started when she was hospitalized for a prolonged period last year for pneumonia and she was given medications to treat it.

C. Difficile and Antibiotic associated diarrhea

A 57 year-old man presented with fever, malaise & bone pain of 1 month. He reported animal contact. His Malta test was positive.

Brucellosis

Intracellular organism

Combination antibiotic for long term

A 40 year-old woman with history of gallstones presented with epigastric pain, fever with chills, itching and passage of pale stool and dark urine. On examination: jaundice, right upper quadrant tenderness.

Ascending cholangitis

Drainage +antibiotic
