Cardiovascular system

Congestive heart failure

1- Digitalis contains cardenolides
2- Strophanthus contains cardenolides
3- Urginea contains bufadienolides

Arteriosclerosis

Ginseng, Hawthorn
Psyllium contains mucilage
Bran contains fibres
Garlic, onion

Hypertension

1- Garlic
2- Olive leaves contains oleouropein
3- roselle (**Hibiscus**) : antioxidant

Angina pectoris

1- Diet and lifestyle: Daily use of aspirin.
2- Herbs:

1- Hawthorn
Use:
cardiotonic, hypotensive, coronary and

peripheral vasodilator.
constituents:
Flavonoids ,Triterpenes

2- Khella (Ammi visnaga)
Use:
Coronary vasodilator
Constituents:
Khellin and Visnagin

Cardiac Arrhythmia

1- Ginseng roots: alkaloids
2- Rauwolfia roots: Alkaloids e.g. ajmaline possess potent anti-arrhythmic effect.
3- Ginkgo leaves: (Ginkgo biloba): ginkgolides decreases cardiac arrhythmia

Respiratory system

Allergic rhinitis

1- Eye bright
Use:
anticatarrhal, astringent and anti- inflammatory. Traditionally used for nasal catarrh, sinusitis and especially for conjunctivitis when applied locally as an eye lotion.
Constituents:

1. Acids; caffeic acid and ferulic acid.
2. Alkaloids.
3. Amino acids; glycine, leucine and valine.
4. Flavonoids
5. Irridoids; aucubin
6. Tannins ; gallic acid
7. Volatile oils

Common cold

1- Elder (sambucus nigra)
Use:
anticatarthal and local anti-inflammatory.
Constiments:

1. Flavonoids; flavonol (kaempferol, quercetin), quercetin glycosides.
2. Triterpenes; oleanolic and ursolic acids.

3. Volatile oils; Fatty acids (primarily linoleic, linolenic and palmitic) and alkanes

2- Eucalyptus

Use: expectorant and antibacterial

Constituents:

1. Flavonoids; eucalyptrin, hyperoside, quercetin, quercetrin and rutin.
2. Volatile oils; eucalyptol (cineole)

- Diaphoretic and circulatory stimulant plants: Glodenseal , Ginger , Cinnamon , Mentha and Tea

Acute and chronic sinusitis

1- Bayberry

Use :

antipyretic, circulatory stimulant, used for cold. used as a gargle for sore throat.

Constituents:

Myricitrin (bronchodilator) , Tannins (astringent)

Tonsilitis

Inflammation and pain

1- immune enhancing herbs

Echinacea

2- Locally/topically as mouth wash gargle spray.
lozenges:
Licorice: anti-inflammatory
Sage (Salvia): astringent and antiseptic
Marshmallow root: demulcent
Myrrh: antiseptic and astringent
Fenugreek seeds; gargle.
Goldenseal, Myrrh and bitter orange; antibacterials

3-**Plants**

1- Sage
gargle and mouthwash
Use:
astringent, antiseptic.
Constituents:
Flavonoids, Tannins

Antitussive

1- Elecampane
Use:
expectorant, antitussive
Constituents:
Volatile oils

2- Liquorice
Use:
anti-inflammatory
Constituents:

Flavonoids, Terpenoids; Glycyrrhizin-glycoside

Asthmatic bronchitis

1- Ephedra

Constituents:

- Alkaloids: ephedrine and pseudoephedrine.
- Volatile oils.
- Tannins (catechin, gallic acid), ephedrans and acids (citric, malic, oxalic)

2- Dorsera

Use:

antispasmodic, demulcent and expectorant

Constituents:

Flavonoids

3- Lobelia

Use:

Respiratory stimulant, anti asthmatic, expectorant

Constituent:

Alkaloid lobeline

UTI

Herbs
1- bearberry (Uvae ursi)

Active constituent: Hydroquinone derivatives (**arbutin**)
Use: antimicrobial

2-Couch grass
Use: diuretic and **anti inflammatory**
All **diuretics** reduce blood cholesterol level & blood pressure

3- Burdock
Active constituents: essential **oil**, sesquiterpenes & lignans (**Arctiin**)
Use: anti-inflammatory

3- Birch
Active constituents: flavonoids
Use: diuretic due to flavonoids

4-Horse Tail
Active constituents: silicic acid , flavonoids
Use: diuretic

5- lovage
Active constituents: volatile oil
Use: antimicrobial

6- Java Tea (cat's whiskers)
Active constituents: essential oil , flavonoids & diterpenes (orthosiphols A)
Use: diuretic, anti-inflammatory & antibacterial

7- cranberry
Use: prevent adhering of bacteria to UT

Benign prostatic hyperplasia

1- Saw palmetto
Active constituents: fatty acids (caproic acid , caprylic acid & myristic acid)

2-Pumpkins
Active constituents: fatty oils (linoleic & oleic acid)

3- Nettle
Active constituents: Flavonoids
Use: diuretic used in UTI & BPH

Gynecological disorders

The most common gynecological disorders include.

1. Dysmenorrhea (painful menstruation).
2. Amenorrhea (absence of menstruation)
3. Menopause related disorder

4. Leucorrhea (excessive white vaginal discharge)
5. Polycystic ovaries

Menstruation related disorder

1- Chaste tree (vitex agnus)
Active constituents: iridoidglycosides (agnuside) & flavonoid (casticin)

2- Shepherd's purse (Capsella bursa)
Use: reduce heavy menstrual bleeding in women

3- Evening Primrose
Active constituents: fatty acids
Use: premenstrual syndrome,decrease inflammation, antiseptic & antibacterial

Menopause

1- Black Cohosh
Use: methanolic (alcohol) extract used in relief of menopausal complaints

Management of skin disorder using herbal products

Acne preparations

1-Brewer's Yeast Saccharomyces cerevisiae
EFFECTS:
The yeast is antibacterial
Uses:
used for itching skin diseases.

2- Tea Tree
EFFECTS:
The terpenes present in the essential oil exhibit antimicrobial activity

Hair growth stimulants Common plants

1-Maidenhair(Oregon Grape)

Wart preparation

1- Garlic,Garlic Oil
EFFECTS:
The allin in the drug has antimicrobial effect

Emollients & moisturizers

1- Avocado
Constituents:
Fatty oil (tocopherols, vitamin E)
EFFECTS:
Avocado oil is an emollient, which improves rough skin.

2- Jojoba
Constituents:
Liquid wax esters, unsaturated fatty acids
USE:
Skin care - cosmetics.

De-pigmenting agents

1- Wild Carrot
Uses:
is an unreliable adjuvant in the treatment of oxyuriasis.

Sunburn preparations

1- White Nettle (Lamium album)
Constituents:
Triterpene saponins
USE:
Inflammation of the skin

Aromatherapy

Used by
- Inhalation
- Topical
- rarely taken by mouth. As Cosmotics (grape seed, almond, jojoba oil)

- Medical aromatherapy

Essential oils have been used as massage in patients during surgery

- Lavender and tea tree oils have been found to have some hormone-like effects. They have effects similar to estrogen (female sex hormone)

CEDARWOOD

Cedarwood oil is often used as a calming agent to help alleviate stress and anxiety. aiding respiratory problems help ease urinary tract infections,

CHAMOMILE

powerful calming agent, antiseptic, antidepressant battle inflammation, specifically urinary tract and can help to eliminate acne.

EUCALYPTUS

powerful treatment against respiratory issues. antiseptic, antispasmodic, diuretic and stimulant.

LAVENDER

healing aid against colds, flu and migraine and stress. antiseptic, antidepressant, anti-inflammatory, diuretic and sedative.

LEMON

Lemon improves concentration, aids in digestion and eases symptoms of acne, natural immunity booster, alleviate headaches and fever, and is a quick mood enhancer.

BERGAMOT

essential oil is used to treat stress,depression, anxiety skin infections like eczema.stimulate the liver and digestive system

CNS

Sedatives & hypnotics

1-valerian root
Constituents :
Valerenic acid

2- Kava-Kava
Use:
Reduce anxiety

Antidepressants

1- St. John's Wort herb (Hypericum perforatum)

Constituents:
Hypericin

Stimulants

1- Caffeine

Analgesics

1- Opium
Constituents:
Morphine
Codeine

2- Willow bark: Salix purpurea
Use:

pain killer
Constituents :
salicin

3- Capsicum
Use:
External pain killer
Constituents:
Alkaloid (Capsaicin)

Migraine

Headache
1- Feverfew leaves
Constituents:
Parthenolide

Toothache

1-Clove oil of flower buds
Constituents:
Volatile oil (**Eugenol** which is a phenol)

Alzheimer's disease

1- Calabar bean (Physostigma venenosum)
Constituents:
alkaloid: physostigmine & Galantamine
Use:
improve memory

2- Ginkgo: Ginkgo biloba

Constituents:
diterpene lactones (ginkgolides A, B and C)

Management of inflammation and pain using herbal products

Post-traumatic, muscle and articular pain

Mild injuries caused by different traumas can result in injuries of muscles, oedema, hematoma & pain.

1- Arnica
Constituents:
Sesquiterpene lactones : **helenalin**

2- Capsicum
Constituents: Capsaicin
External Use

3-Devil's claw
Constituents:
Harpagoside iridoid
Use:
Analgesic & anti inflammatory used for the relief of minor articular pain

Headache

1- Feverfew
Constituents:
Parthenolide sesquiterpene
Use:
Migraine headache

Herbal products as immunomodulant

Immuno-stimulants

1-Echinacea
Constituents:
Polysaccharides and glycoproteins.
Use:
Common cold, superficial wounds, اي حاجة

2- Elder
Constituents:
Hyperoside & Rutin
Use:
Anti-microbial

3-ginseng

4- bitter Orange

Herbal products as adaptogens

- physical and psychical stress may lead to the exhaustion and damage of the organism.
- Damage as Gastric ulcer, irritable bowel syndrome and anxiety are consequences of excessive stress.
- resistance to stress may be improved by adaptogens.
- Adaptogens have multiple psychological & physiological activities that decrease stress

List of most widely used adaptogens :

1. Ginseng : struggle fatigue and stress

2. Goji berry (Lycium barbarum) : increase Stamina

3. Jiaogulan (Gynostemma **Pentaphyllum**) : Reduces stress

4. Licorice root : Reduces stress

5. Rhodiola rosea : physical and mental fatigue.

6. Schisandra berry/Magnolia berry : mental performance

7. **Turmeric** (**Curcuma** longa) : Boosts brain function and reduces depression.

- **Detailed herbs**

A- Ginseng
Constituents:
Saponin (Ginsenosides)
B- Rhodiola
Constituents:
Phenylalkanoids (salidroside)
