Organized Medical Information

1. Herbs containing mucilage

- • Mucilage forms a protective coating over inflamed tissues, reducing pain and irritation.
- • It retains moisture, preventing dryness of the throat and promoting healing.

2. Tannins and urinary tract health

- • Tannins cause vasoconstriction and help prevent bacteria from adhering to the urinary tract walls, reducing infection risk.

3. Methylxanthines in tea and coffee

- • Tea and coffee contain methylxanthines (like caffeine), which stimulate the central nervous system, promoting wakefulness and intellectual activity.

4. Citrus fruits and immune function

- • Citrus fruits are rich in vitamin C and folate.
- • Vitamin C supports immune barriers and reduces inflammation.
- • Folate supports the production and function of immune cells and DNA synthesis.

5. Fruits and vegetables in cardiovascular health

- • Many fruits and vegetables are rich in vitamin C and beta-carotene.
- • These antioxidants help slow or prevent atherosclerosis by reducing plaque buildup in arteries.

6. Avocado and cholesterol levels

- • Avocado decreases LDL ('bad' cholesterol) and increases HDL ('good' cholesterol), helping to prevent atherosclerosis.

7. Ginseng and health benefits

- • Ginseng is rich in antioxidants and may improve brain health, enhance immune function, regulate blood sugar, and offer anti-inflammatory, antioxidant, and anti-fatigue effects.

8. Peppermint and gum health

- • Peppermint has anti-inflammatory, antiseptic, and antimicrobial properties.
- • It helps reduce gum inflammation and irritation.
- • Using peppermint mouthwash or toothpaste promotes healthier gums.
