* ELecampane :. - expectorant - antitussive - diaphoretic - bactericidal "uses"

Active Constituents :. - Volatile oils - Carbohydrates

* liquorice :. - expectorant - demulcent - anti inflammatory "uses"

CamScanner

6 Asthmatic bronchitis :.

* Ephedra :. - Vaso constricting
- bronchodilating
- central stimulating properties
"uses"

Active constituents :. - Alkaloids "ephedrine"
- Volatile oils.

* Drosera :. "sundews"
- antispasmodic
- demulcent
- expectorant.
"uses"

Active constituents :. - Flavonoids.

* lobelia :.
- respiratory stimulant
- antispasmodic
- antiasthmatic
- expectorant
- antiemetic
"uses"

Active constituents :. Alkaloids :. lobeline.

Cardiovascular system disorders :.

1 Congestive heart failure :-

"Active ingredients"

* Digitalis purpurea :- Cardiotonic glycosides or Cardenolides

⇒ The most important Cardiac glycoside is digitoxin and digoxin.

2 Hypertension :.

Common CVS disease.

* Garlic :. "Allicin-releasing"
- anti oxidant
- inhibition of blood aggregation

* Roselle :. الكركديه
- Direct vaso-relaxant effect.
- Action on Calcium channels.

CamScanner

(3) Angina pectoris :-

ttt :- (a) Diet and life style.
(b) Daily use of aspirin.
(c) Consumption of fruits and vegetables.

herbal ttt :-

* Hawthorn :- • Vasodilator on Coronary arteries.
• anti oxidant activity.
" uses "

Active constituents :- • flavonoids
• Triterpenes

* Khella :- Kellin, Visnagin "active ingredients"

(4) Cardiac Arrhythmias :-

(1) Ginseng root (2) Rauwolfia root (3) Gin Kgo leave

Free radical Scavenger

Central Nervous System disorders :-

(1) Sedative and hypnotics :-

* Valerian roots :- • Contain volatile oil and iridoid. "active constituents"
• Contain Voltrate and Valerenic acid.

* Kava-Kava :- CNS depressant, analgesia. "active constituents"
⇒ Shouldn't be combined with alcohol or medications for anxiety or insomnia.

(2) antidepressants :-

* St. John's Wort herb :- Hypericin. "active Constituents"

(3) Stimulants :-

* Caffeine.

=> Drinking plenty of fluids :- Adding extra fluids, especially water, to your daily routine can help remove extra bacteria from your urinary tract.

=> Drinking six to eight glasses of water per day is recommend

* Bear berry :- arbutin , hydroquinone "active constituents"

hydrolysed by intestinal flora → aglycone

"because The alkaline PH of The urine" hydrolysis in urinary tract to be

"uses"

- has antibacterial effects against pathogens

* Couch grass :- - poly saccharides "active components"
- diuretic action "uses"

* Burdock :- - essential oil , lignans "arctiin" "active components"

* Birch :- Diuretic effect caused by The presence of flavonoids.

* Horsetail :- diuretic effect "uses" , flavonoids , silicic acid. "active components"

* lovage :- Z-ligustilide "active component" , diuretic effect "uses"

CamScanner

* Java Tea (Cat's Whiskers): (6)
- anti inflammatory and antibacterial effect. "uses"
- increase the amount of urine.

Active Components: potassium salts, essential oil.

"orthosiphol A"

Benign prostatic hyperplasia BPH:

* Saw Palmetto: Caproic acid, Myristic acid "active constituents"

"fatty acids"

* Pumpkins: linoleic acid, oleic acid "active constituents"

"fatty acids"

⇒ A pumpkin seed alcohol extract inhibited the enzymes aromatase and 5-alpha-reductase. Also, increased the bladder volume and decreased the urination frequency.

* Nettle: β-sitosterol, Coumarins. "active constituents"
- blood glucose-lowering, increase insulin secreation from pancreatic cells and diuretic effect. "uses"

Inflammation and pain:

posttraumatic, muscle and articular pain:

* Arnica: sesquiterpene lactones, "active components"
helenalin, dihydrohelenalin. "for muscular pain" "uses"

⇒ such chemicals modifying the action of immune cells, kill bacteria, reduce the activity of chemicals and blood cells that cause inflammation, and kill cancer cells.

* Capsicum: Capsaicin, Capsaicinoid content, "active components"
external — agonist in receptor, that the neurons responsible for perception of pain.

* Devil's claw: harpagoside iridoid. "active component"
"Harpagophytum"
- for minor articular pain, mild digestive pain.

CamScanner

Immunomodulant :-

7

1) Echinacea :- - Echinacoside, caffeic acid "active component"
- Alkamides "anti inflammatory"

echinacoside exerted antimicrobial activities against several bacteria, and virus like rhinoviruses, prevention and ttt of The Common Cold. "uses"

2) Elder :- Hyperoside, Rutin "active Component"
- anti microbial effect. "uses"

---

adaptogens :-

- ginseng :- Boosts working memory, reaction time, Calmness and immune system.
- Astragalus :- Combats fatique.
- Jiaogulan :- reduces stress and boosts endurance (gynostemma pentaphyllum)
- Licorice root :- reduces stress.
